Department: Law
Salary: 4500

Row 3:
Name: Ali
Age: 30
Department: HR
Salary: 4000

Row 4:
AI_Summary: Here's a summary of the report based on the provided data preview:

---

1) **Short Summary**
    The preview data features three employees across three different departments (IT, Law, HR), with ages ranging from 27 to 30. Salaries for these individuals range from 4000 to 5000, with the IT department employee having the highest salary in this small sample.

2) **Top Findings**
    *   **Limited Sample Size:** The report is based on only three employee records, making it difficult to draw generalizable conclusions.
    *   **Age Profile:** The employees in this sample are relatively young, ranging from 27 to 30 years old.
    *   **Departmental Diversity:** The small sample already shows representation across three distinct departments (IT, Law, HR).
    *   **Salary Range & Observation:** Salaries vary between 4000 and 5000. In this specific preview, the IT department role has the highest salary.

3) **Suggested Next Actions**
    *   **Expand Data Collection:** Gather a significantly larger dataset of employees to enable more robust analysis and identify actual trends, patterns, and anomalies.
    *   **Analyze Departmental Compensation:** Once more data is available, perform a detailed analysis of salary structures across all departments to understand compensation variations and ensure fairness.
    *   **Demographic Analysis:** Investigate the full age distribution and other demographic data (e.g., experience levels) to better understand the workforce composition.
    *   **Performance Metrics Integration:** Consider integrating performance data to correlate with salaries and roles, providing a more comprehensive view of human capital.
